RE: REQUEST FOR INDUSTRIAL TRAINING (IT) ATTACHMENT FOR OUR BSc. IN COMPUTER SYSTEMS AND NETWORKS (CSN) STUDENT.

The captioned heading above is being referred.

The department of Computer Systems and Mathematics (CSM), Ardhi University is requesting for your support in attaching our student ..... with registration number ..... in your organization for an industrial training scheduled to begin from **17th July to 8th September 2023.** One of the requirements of this degree programme is that second year students must attend industrial training for a period of eight (8) weeks, which aims to instil in students the right kind of work attitudes and professionalism through interaction with people in the organisations, and observation of their future roles in industry. The success of the industrial training depends very much on the willingness of the industries to accept the students in their folds.

The concerned student is a second year trained through problem-solving approach using Computer systems and Networks with ability to perform the following activities:

- Design and develop application using Internet of Things (IoT)
- Analyze, troubleshoot, and maintain both wired and wireless network operations.
- Installation, configuration, operate and maintain any type of computer-based software.

Kindly note that, student has already been provided allowances to facilitate participation during attachment, that is to say, there will be **NO** financial burden caused to your organization. We look forward to a meaningful development of the University-Industry relationship between your company and Ardhi University.

Sincerely,

Dr. Aristides Lambura
For Deputy Vice Chancellor Academic Affairs
